

## GENERAL INFORMATIONS

GENERAL INFORMATIONS	Battery name	IT5 AGM
	Product Range	ITINERIS AGM - Stop & Start: Absorbive glass mat
	European Type No. (ETN)	595.901.085
	Polarity	DX
	Technology	AGM
	Application	Stop & Start
	Standard ref.	EN 50342-1; EN 50342-2

The new JET BATTERY that completes our line of products for Stop&Start motors with braking energy recovery. The AGM (Absorbive Glass Mat) battery's electrolyte is completely absorbed by the separator, so that the acid is retained even if the unit is overturned for a long period of time. Gas recombination technology and the use of caps with valves on each cell enable the battery to be installed in the passenger and luggage compartments. The design of the grilles and the composition of the active material makes it especially suited to cyclic applications.

GENERAL CHARACTERISTICS	Voltage (V)	12	Dimensional group	LN5
	Capacity 20h (Ah)	95	Sizes (LxWxH) (mm)	353 x 175 x 190
	Cold cranking Amps (CCA), EN (A)	850	Base Hold-Down	B3(f)
	Energy at 20hrs rate and 25C (Wh)	1,135	Lay-out/Terminals	0 / 1
	Cranking Power 10" at -18°C (KW)	6,6	Battery weight ± 5% (kg)	26,4

BOX	Case	PP/PE	Colour	Black
	Lid	PP/PE	Colour	Black
	Plug	PP/PE	Colour	Black
